

ALTOFINA™
LAMINATE COLLECTION

Welcome to a true world of **colour**. ALTOFINA offers great design, a perfect finish and high quality service, all at a price that comes within budget.

Take a look at the Altofina HPL collection. Dazzling and innovative décors, finishes and performance grades have been introduced to mingle with a selection of mainstream decorative laminates. This balanced collection is available for you to create interior spaces that are both brilliantly designed and commercially affordable.

The Range

A collection of 95 stunning décors and textures.

We've split our collection into simple categories, dependent on their visual design.

Our décor names are straight forward and the finish available noted under each swatch on the relevant range page.

All décors are available as:
3050mm x 1220mm

Some décors are also available as:
3660mm x 1525mm and
2440mm x 1220mm.

Plain Colours

Add a splash

A range of 42 plain colours, 8 super modern décors in our Tuff Gloss range which feature the very latest in laminate surface technology.

Wood Effects

Go against the grain

27 different wood effects with a variety of different finishes. We also now offer a range of décors specifically for walls and doors.

Abstracts

A new reality

10 diverse and modern effects which have been inspired by materials from the real world.

Metallics

Bend the rules

8 different metallic effects, created from real metal foil, perfect for the most demanding of spaces.

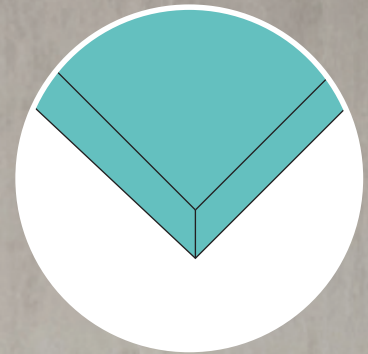

Quality

Altofina high pressure laminates fully comply with the requirements of BS EN 438, NEMA LD3, ISO 4586 parts 1 and 2, including abrasion, impact, moisture resistance, postformability, tensile strength, safety of installation and ease of maintenance. All Gloss, Tuff Gloss and Metallic ranges have a protective foil to reduce the risk of scratching during fabrication and installation. In addition, a protective foil is applied on all textured Plain Colours with an LRV value of 30 or less. The foil can be easily removed either before or after the installation is complete.

Fabrication

Altofina can be bonded to various grades and thicknesses of chipboard, MDF, metal, mineral, lightweight honeycomb and other substrates to create a rigid panel. All décor ranges, with the exception of the Metals range, are available in postforming grade allowing both flat and curved applications for projects that need seamless shapes.

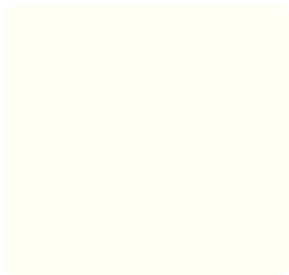

ABS Edging

Acrylonitrile Butadiene Styrene (ABS) is a thermally resistant thermoplastic and is highly impact resistant. ABS edging can be bonded to the edges of Altofina panels to provide additional impact resistance and its colour matches all of Altofina's design ranges. ABS edging is suitable for flat panel edging as well as internal and external radii. It has excellent end of life disposal characteristics.

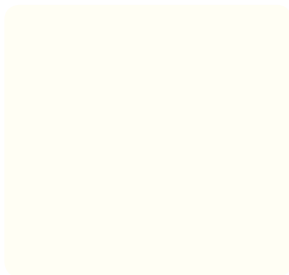

Altofina can be used on all interior fitout projects, both for commercial and residential applications.

Plain Colours

Add a splash of colour to your room, from vivid spectrum to calm neutral, our colours will give you vast expanses of perfectly level, solid and consistent colour.

Environmental Policy

Altofina is manufactured using environmentally sound production techniques. All of Altofina's plain colours, wood effects and abstracts achieved FSC accreditation. The Altofina wood effect range achieves the look and feel of real timber, thereby avoiding the need to cut down rare and exotic species. The UK and Ireland distributor of Altofina is Blackheath Products Ltd, who is an accredited FSC and PEFC chain of custody supplier.

Protective Foil

Protective foil is added to all of the darker and gloss décors within the range. When post forming it is advisable to remove this coating from the area being heat treated.

LRV value

All plain colours have a Light Reflectance Value (LRV) this is the amount of visible light that a colour will reflect.

NCS, RAL and BS Colours

All plain colours have a nearest corresponding NCS number. Many of them have also been matched to nearest RAL and BS numbers.

Gloss Surfaces

Gloss surfaces are more prone to scuffs and scratches than other finishes, so additional care should be taken.

Sample Service

A4 sample folder: we can send you laminate samples of any of the décors you are interested in.

USB drive: a data drive containing high-res images off all décors in the range. These images can also be downloaded from the website.
